3. **Write a script to compare input numbers and print if bigger than 10 or not.** *[10 points]***

Ans.

```powershell
# Read user input
$Num = Read-Host "Input a number"

# If statement to compare the user input value with the number 10
if ( 10 -lt $Num ) {
    Write-Host "Number is bigger than 10."
}
elseif ( 10 -eq $Num ) {
    Write-Host "Number is equal to 10."
}
elseif ( 10 -gt $Num ) {
    Write-Host "Number is less than  10."
}
else {
    Write-Host "Error"
}
```

Notes:

- `if statement` : Describes a language command you can use to run statement lists based on the results of one or more conditional tests. Read more
- `Write-Host` : Writes customized output to a host. Read more
